**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04/22/2008 has been entered.

2. The Amendment filed by Applicant on 02/29/2008 has been entered.

***Response to Amendment/Arguments***

3. Applicant's amendment and arguments filed on 02/29/2008 have been fully considered and they are found persuasive.

4. The rejection of claims 1, 14-19, 21-22 and 27 under 35 U.S.C. 102(b) as being anticipated by Fujinawa et al., U.S. Patent No. 6,762,249 (hereinafter "Fujinawa") is withdrawn.

5. The rejection of claim 1 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is withdrawn.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

7. The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

8. Claims 1, 5-7, 14-18 and 27 are rejected under 35 U.S.C. 102(e) as being anticipated by Botelho et al., U.S. Patent No. 6,775,451 (hereinafter "Botelho"). Botelho teaches an encapsulated composition comprising one or more oligomer, tricyclodecane dimethanol diacrylate and a thixotropic agent (silica). See Botelho, Abstract; col. 2, lines 43-53; col. 3, lines 26-34; col. 5, lines 47-48; col. 6, lines 55-60; col. 9, lines 45-61; col. 15, lines 21-47. Botelho further teaches a fiber optic ribbon containing the encapsulated composition. See Botelho, col. 16, lines 28-40.

***Claim Rejections - 35 USC § 103***

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

10. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for

Art Unit: 1796

establishing a background for determining obviousness under 35

U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

11. Claims 9, 13 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Botelho in combination with Fabian, U.S. Patent No. 6,553,169 (hereinafter "Fabian"). Botelho does not teach the use of filler material or a silane coupling agent. Fabian teaches in analogous art an optical fiber coating composition. Fabian teaches the use of a filler and silane coupling agent. See Fabian, col. 4, lines 15-27; col. 7, lines 35-40 and col. 7, line 64 through col. 8, line 8. In view of Fabian, one having an ordinary skill in the art would be motivated to modify Botelho by using a filler and silane coupling agent to enhance the optical fiber encapsulated coating composition. Such modification would be obvious because one would expect that the use of optical material as taught by Botelho would be similarly useful and applicable to the optical material taught in Fabian.

12. Claims 10 and 22 are objected to for depending on a rejected base claim.
